

Inspection does not include the following items

- Brake function and lining material, brake drums, limited to what is immediately visible
- Evidence of brake fluid contamination
- Anti-lock braking system (ABS) mechanics
- Meters indicating oil and fuel consumption or the degree of oil and fuel consumption
- Reason for oil leaks
- Oil pump strainer to assess sludge build up
- Wheel cylinders
- Standard to which repairs or service history have been completed
- Engine cylinder compression
- Engine mountings
- Odometer and camshaft belt, drive belt and timing belt
- Estimated expiry of exhaust system, clutch, dual mass flywheels
- Functionality of audio-visual or entertainment system including CD,
- Cassette, TV, DVD, iPod connectivity, sensors, alarm/ security devices,
- Satellite navigation systems/GPS
- Degree of gas emissions
- Catalytic converters
- Additional accessories included as a result of owner's modifications
- Mechanical switching of wipers and lights
- LPG systems

Disclaimer:

- This Pre-Purchase Inspection Report can only take into account the visible condition and the operation of the vehicle at the time of the inspection. KCL Mobile Automotive will not be responsible for any defects that are discovered which were not apparent during the inspection.
- The Pre-Purchase Inspection will cover the vehicle's engine bay, wheels & tyres, brakes, exterior and interior, underbody and a road test (if possible).
- Despite all efforts by inspectors, there is no guarantee that this inspection will identify every fault or defect with the vehicle.
- The Pre-Purchase Inspection Report is not a certificate of roadworthiness.
- The Pre-Purchase Inspection is based off the external view of your vehicle and its components. It is not possible to conduct in-depth checks that involve removing, inspecting and re-installing parts due to the time and cost involved. The inspection will include assessment based on noise, operation and performance on the road test. If you wish to have particular parts inspected more closely, you will need to book your vehicle in for that specific part inspection.
- Inspectors will inspect the visual condition of components as well as their operation. They will also check the general condition of the vehicle at the time of the inspection.
- A short road test to assess steering, suspension, brake operation, engine and driveline operation will be conducted.
- Some issues do not become apparent unless higher speeds are tested or achieved (e.g. wheel bearings).
- Subject to all applicable laws, KCL Mobile Automotive does not provide any guarantee, warranty or representation regarding the nature, reliability, accuracy or completeness of any information contained in the Report or the fitness of the information contained in the Report for any purpose intended by you.
- Except to the extent that liability cannot be excluded, KCL Mobile Automotive, will not be liable to you for claims arising out of or in connection with your access and use of this Report whether arising in contract, tort (including negligence), indemnity, strict liability, breach of warranty or statute.
- To the full extent permitted by law, KCL Mobile Automotive will not be liable to you for loss of use, production, profit, revenue, business, data, contractor anticipated savings or for delay or for any financing costs or increase in operating costs or any economic loss for any indirect or consequential loss or damage.

2. General Exclusions

- This Pre-Purchase Inspection will not tell you everything you need to know about the vehicle.
- The Pre-Purchase Inspection will not tell you about defects that have been hidden or concealed. Additionally, problems that only occur intermittently and that are not apparent during the inspection, or problems which cannot be identified by a visual inspection will not be reported.
- During the inspection, the engine may not be tested through the full operating temperature range. As a result, issues that only become apparent when the engine is cold may not be detected if the engine is presented hot.
- Documents that accompany the vehicle (vehicle service records, vehicle manual, damage reports and repair records) will not be inspected. Preparing these documents is not part of your Pre-Purchase Inspection and their accuracy will not be verified.
- The Pre-Purchase Inspection does not check for recall notices issued by the manufacturer of the vehicle.
- To avoid damaging the vehicle's drive train, if your vehicle is only equipped with a part time 4WD system, and not designed for full time 4WD, it may not be driven in 4WD during the inspection.

3. The Pre-Purchase Inspection Report

- a. Only items in the Pre-Purchase Inspection checklist are assessed along with any additions requested by you.
- b. We must be notified of any additional items that you request to be inspected at the time of booking.
- c. The inspector will only report on defects apparent at the time of inspection.
- d. Inspectors will provide their professional opinion of the overall visual and operating condition of the vehicle. Any professional opinion provided is a matter of subjective opinion based on the inspectors' knowledge and experience, with an aim to assist you in making informed decisions.
- e. Although the Pre-Purchase Inspection has been requested to help you make the decision to purchase a vehicle, you must be aware that the Pre-Purchase Inspection report is not a recommendation to either purchase or not purchase the vehicle. You are solely responsible for making that decision, and you must consider whichever factors you see relevant.

4. Risk to Purchaser

- a. As stated, this Pre-Purchase Inspection is a brief visual and operational check of the components on the vehicle. As there is limited ability to detect hidden or intermittent faults, purchasing a vehicle without warranty from the seller may expose the buyer to risks that could become quite significant.
- b. As it is defined, this inspection will only consider the vehicle in the condition and at the time it is presented. Defects or issues may become apparent, which were not identifiable at the time of inspection.
